## Prospective students and parents come on campus for Marist's annual Preview Day

By Helen Kwak

Last Saturday, Marist held its annual Preview Day, a day in which prospective students and their families visit the school to see what it has to offer and Principal Jay Conroy called it a "smash hit."

Students and their families spent the first two hours of the day touring around the campus to hear lectures from each academic department and a panel of students

and alumni.

The last hour of the day was spent in the Activity Center, where booths representing clubs and sports were set up to give information and answer questions.

"Many were surprised by how much Marist had to offer," said organizer of the day, Marist Dean of Admissions and Students, Stacey Baker.

## O'Hara students visit Eden

By Katie Meyers

On the morning of Wednesday January 19, the Children of Eden cast held a special performance for the 7th and 8th grade O'Hara students.

"We had a good time performing for the younger kids, and we gave it our best!" said Senior Micah Stratton, who played God in the play.

**Can't make it to the basketball games on Tuesdays and Fridays?**  
Every home game is now being broadcasted live at marisths.org under athletics and video. Seniors Ray Ferrari and Carson Kiesewetter are the commentators and analysts for the games. Check it out!!!

## It's a Girl!

By Micah Stratton

Marist math teacher Stacey Chase is the proud mother to Natalie Chase, born in the cold month of December, who brings warmth and happiness to the Chase house. Both mom and baby are healthy, and Chase will be returning soon to resume teaching. The Marist community wishes her and Natalie all the best!

## No Dead Week?

By Helen Kwak

With final exams approaching, students are showing up this week with bags under their eyes and professing their unhealthy stress-level. I am one of these self-professing students.

Marist does not have a "Dead Week," a week dedicated only for reviewing and preparing for their final exams, which is true, because we have so much more to do.

Instead of just preparing for finals, I find myself also studying for my Pre-Calculus test, making final revisions for an AP Language and Composition project, writing a rhetorical argument essay for the same class, and most prevalently, going to bed at 3 a.m. and then lying awake, too stressed to actually sleep.

I catch myself complaining to my sister, who is probably just as stressed as I am and, in horror, I realize I have gotten bags under my eyes as well.

Without a solution, I have resorted to surfing the web to find a cure to this unattractive predicament.

Sure, this isn't "Dead Week," but I certainly feel "dead."

## 3-D Cells

By Morgan Silver

After a month of studying cells, biology teacher Pat Wagner's sophomore students finished last week after given the task of recreating a cell and explaining all the parts and functions. Completed projects included presentations and three dimensional figures.

## Exploring the Old West

By Ray Ferrari

This week, juniors in Bill Ferrari's AP Literature and Composition class presented projects on their interpretation of the American West.

Students got creative with their presentations, doing things from dressing up to handing out baked beans and biscuits.
